Thermo Strip

Floor Finish Remover

Thermo Strip

Where to Use

THERMO STRIP is user friendly with significantly reduced toxicity and much less odour than conventional products. THERMO STRIP has more effective cleaners that spread more evenly and require less scrubbing than the original formula. THERMO STRIP is a multi-method floor finish remover formulated for use with conventional machine agitation, or in mop-on systems not requiring machine agitation. Quality finishes will form a tight bond with a THERMO STRIP floor even without rinsing. However, rinsing thoroughly will provide a cleaner, smoother surface and enhance the appearance of the finished surface.

Benefits

- Removes all floor finishes, even burnished thermo-plastic finishes and heavy build-up.
- Works equally well with conventional machine agitation, with auto scrubbers, and as a mop-on stripper.
- One pass is all that's needed to strip most floors.
- Use only the amount needed for the job at hand.
- One-step stripper.
- Rinsing not necessary
- No nonyl phenol ethoxylates
- Low odour
- Concentrated

Dilution Ratios (Using Hot Water)

Recommended Dilutions Machine Agitation Method

1:16 (240ml / 3.8 Litres) of water - Light Finish Build-up
1:8 (480ml / 3.8 Litres) of water- Moderate Finish Build-up
1:6 (640ml / 3.8 Litres) of water- Heavy Duty Build-up
1:4 (960ml / 3.8 Litres) of water- Extremely Heavy Build-up

Mop-on, No Agitation Method

1:8 (480ml / 3.8 Litres) of water- Light Finish Build-up
1:6 (640ml / 3.8 Litres) of water- Moderate Finish Build-up
1:4 (960ml / 3.8 Litres) of water- Heavy Duty Build-up
1:3 (1290ml / 3.8 Litres) of water- Extremely Heavy Build-up

Directions for Use

Machine Scrubbing Directions:

1. Apply Thermo Strip solution liberally with mop or automatic scrubber, using hot water.
2. Allow three to five minutes chemical action time.
3. Agitate solution with floor machine or automatic scrubber.
4. Pick up the emulsified finish with a wet vacuum or automatic scrubber.
5. Rinse with a solution of Perfecto 7 (30ml/3.8 litres of cool water). Rinse again with clear water and vacuum dry.
6. Allow floor to dry thoroughly before beginning the re-coat process.

Distributor Contact Info

No-Scrub Directions:

1. Apply Thermo Strip solution liberally with mop, using hot water.
2. Allow 3 to 5 minutes for the chemical to dissolve finish build-up.
3. Agitate solution with the mop.
4. Pick up the dissolved finish with a wet pick-up vacuum (preferred), or with a clean mop and clear water.
5. Rinse with a solution of Perfecto 7 (30 ml/3.8 litres cool water). Rinse again with clear water and pick up as much excess moisture as possible with rinse mop, or vacuum dry.
6. Allow floor to dry thoroughly before beginning the recoat process.

The No-Scrub method is ideal for small or congested areas like check-out stands, rest-rooms storage areas.

Note: Do not leave in contact with flooring substrates longer than 5-minute intervals as tile integrity and/or colouring may be severely or permanently damaged.

Properties	
Color	Orange
Fragrance	Mild
Viscosity	Water, Thin
VOC's (% by weight) EPA Method 24	12.65%
pH (concentrated)	13-14

Available Packages	Package Code	
4x3.8 litre case	# 11259039 	
18.9 litre pail	# 11259048
