Enviro Care[®] Washroom Cleaner

Restroom Cleaner

Enviro Care® Washroom Cleaner

Where to Use

For keeping basin, urinal and washroom surfaces clean and fresh in one easy step. Its mild food-grade acidic formula removes soap film, body oils, and make-up from any washable surface without damage. This one-step cleaner cuts through grime and requires no rinsing. Using a sprayer, hand bucket and sponge, or mechanical spray device, simply apply the solution to the surface and wipe clean. Chrome, stainless steel and other high gloss surfaces may be polished with a clean, dry cloth, if desired. Also excels at removing those difficult stains from ceramic tile floors and grouting.

Benefits

- Non Toxic (aquatic & human)
- Biodegradable*
- Not formulated with:
 - Petroleum Distillates
 - Glycol Ethers
 - Alkalies
 - NPE
 - Hydrochloric or Phosphoric Acid
- Non Corrosive

* As defined in 40CFR796.3200 EPA/TSCA

Dilution Ratios:

Normal Soil Loads: (1:16) 8 oz. per gallon/240ml per 3.8 litres of water)
Dilute with water from the cold tap.

Improper use or dilution may result in damage to the surfaces and may increase health effects.

Directions for Use

For removing soil accumulations and reducing hard water deposits, apply to any washable surface using a sprayer, cleaning cloth, swab or brush. Allow time for the chemical action to begin dissolving the soils. If needed, scrub, using a mild abrasive pad or brush. Exercise caution when using abrasive pads on chrome, stainless steel, formica or painted surfaces, as they may scratch these surfaces. For routine cleaning it is generally not necessary to use a brush or other abrasive tool. Simply clean, using a sponge or cloth, then polish with a dry towel. Rinsing is typically not necessary.

* Enviro Care Washroom Cleaner RTU does not need dilution.
